

PROFESSIONAL SFX TEETH

for the most demanding

Photo: Frank Lübke
Mask: Birger Laube

Dental Special Effects

Made in Germany

At alphabite, we create film teeth and dental special effects that meet the highest standards of quality, material, safety and appearance.

Our experts develop extraordinary ideas, working hand in hand with make-up artists, actors, producers, directors, writers and creative directors.

Thanks to the more than 30 years of experience of our master dental technicians, each dental effect can be individually manufactured to match the dental impression of the model. This starts with the 3D dental scan with 100% accuracy.

Undisturbed speaking or singing is possible without any problems.

The goal of our work is the authentic overall image of a character.

We pay careful attention to physical features and our collaboration with make-up artists.

Your Advantages

Exclusively at alphabite®

Free Product Sample

Convince yourself of our quality.

Meaning: No costs and no risk to you.

Liability-free

Rely on us: We take full responsibility for all liability issues.

Worldwide

We work for projects all over the world, using a mobile 3D scanner and manufacturing in Germany.

Highest Standards

Quality, reliability, service: thanks to dental technicians with over 30 years of experience.

Uncomplicated

Fast communication, fast response.

Whether by WhatsApp, phone or mail.

24/7-Service

Professional effect teeth with PRO support.

We are there when you need us.

Efficient

Save time and money with a partner you can rely on. No trial and error, more time for your jobs!
